Abstract

The aim of this working paper is to illustrate the whole process from the policymaking in the United Nations – in this case at Food and Agriculture Organization (FAO), to the implementation and its effects on the field. In order to achieve the Sustainable Development Goals (SDGs), the effective policymaking and implementation are essential; collaborations with local stakeholders and partnerships are more and more pervasive and necessary. Through anthropological research and quantitative research on the ground, it demonstrates how International Organizations and academia as well as other important actors.

The first part shows the organizational structure of FAO and the process of policymaking in the head quarter. In the second part reports the result of one of FAO's projects implementation and the process of its effectiveness.
