

BLOCKCHAIN KAIGI 2023

October 28-29, 2023

RIKEN Kobe Campus,

Interdisciplinary Innovation Building (IB)

Blockchain Kaigi 2023 is an international conference on blockchain and its applications, bringing together researchers from various scientific and technical communities and practitioners from various fields who are active in fintech, crypto assets and blockchain related fields. We invite you to present your theoretical or applied research on blockchain in general.

Wakefield Scott Stornetta

Since 1991, Dr. Stornetta's pioneering series of papers and patents have laid the foundation for Bitcoin and other digital currencies. Three of the eight citations in the Bitcoin White Paper mention their work.

Aanchal Malhotra

Dr. Malhotra is the Head of Research at Ripple Lab Inc., where she has been responsible for DeFi protocol design and cryptography research and development, introducing new features such as NFT on XRP ledgers, Automated Market Maker (AMM), and Decentralized Identity (DID).
